Memory build

Look. Hide. Build it from memory.

Each card shows a small build. You get a quick look, then you build it from memory.

You need

- The memory cards, cut out
- A bin of loose bricks
- 2 or more players

How to play

1. Pick a card. Look at the picture. Take a good long look, then turn the card over.
2. Find the pieces and build it from memory.
3. Turn the card over to check. Count what you got right.
4. Take turns. Easy cards are 3 pieces. Tricky cards have more.

Scoring

- 1 point for every piece in the right place and colour.
- A bonus 3 points if the whole build is right.

Make it harder or easier

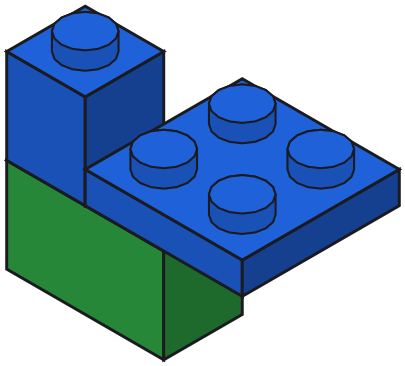

- Easier: keep the card in view but only for one look at a time. Harder: build it in a different colour pattern and say what changed.

Family mode

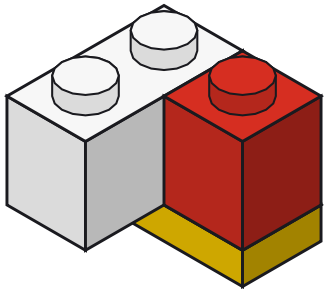

- Two teams. Each member looks, then the whole team builds together from what they remember.

Small parts. Choking hazard. Not for children under 3.
