Tallest tower

Build the tallest tower with the rules on the card.

Each card is a different tower challenge. Same rule for everyone.

You need

- The challenge cards
- A bin of bricks
- A flat table or floor

How to play

1. Draw a challenge card. Read it out.
2. Everyone builds at the same time. Stop when the card says or when someone says Stop.
3. Tower must stand on its own for a count of 5.
4. Count the bricks high. A plate counts as a third of a brick. The tallest wins.

Scoring

- Winner gets 2 points. Anyone within one brick of the winner gets 1.

Make it harder or easier

- Easier: use any pieces. Harder: use the card rule and one hand.

Family mode

- One tower together: take turns adding a piece. If it falls, the person who added last picks the next card.

Small parts. Choking hazard. Not for children under 3.

Tallest tower

Use only 1x1 bricks.

Tallest tower

Use only 1x2 bricks.

Tallest tower

Use only one colour.

Tallest tower

Use exactly 12 pieces.

Tallest tower
